

**Extract and print the total population of all the countries in the console.**

**JS File:**

```
// step 1 -- create a request variable
var request = new XMLHttpRequest();
// step 2 -- create a connection
request.open('GET','https://restcountries.eu/rest/v2/all',true);
// step 3 -- send the request
request.send();
// step 4 -- process and load the response
request.onload = function() {
    var data = JSON.parse(this.response);
    var total = 0;
    for(let i=0; i<data.length-1; i++)
    {
        total += parseInt(data[i].population);
    }

    console.log(total);
}
```

**HTML file:**

```
<!DOCTYPE html>
<html lang="en">
